5	Ribbon Strip Plate & Ribbon Static Brush ZE500-6 RH & LH	P1046696-044	1
6	Cables for Printhead (power, data, ground) ZE500 Series	P1046696-007	1
7	Latch for Print Mechanism ZE500 Series	P1046696-008	1
	Ground Contact for Print Mechanism ZE500 Series	P1046696-107	1

Printhead dpi conversion kits

ZE500 Series printers will have either a **Standard Life Media Drive System** installed or an **Extended Life Media Drive System** installed. These different types of drive systems require ordering different part numbers. Please read the notes below to determine the correct part number to order based on the type of media drive system that is currently installed on the ZE500 printer in question.

The absence of the extended life media drive system identification label indicates a standard life drive system is installed.

The presence of the extended life media drive system identification label indicates an extended life drive system is installed.

- Determine the type of media drive system that is currently installed on the printer by verifying the presence or absence of the Extended Life Media Drive System label. ZE500 printers that currently have the extended life media drive system installed can be identified by the presence of a label affixed to the drive system cover displaying the text “**Extended Life Media Drive System**”. The absence of this label indicates that a standard life media drive system is currently installed on the printer.

Additional Information:

- ZE500 printers with serial numbers greater than 67J160800058 for 4 inch wide models and 68J160800073 for 6 inch wide models have an Extended Life Media Drive System installed.
- ZE500 printers with serial numbers less than 67J160800058 (for 4") and 68J160800073 (for 6") shipped with a standard life media drive system installed, but these printers may have been upgraded to use an extended life media drive system via the installation of one of the extended life media drive system kits.

Item Number	Description	Standard Life Media Drive System Part Number	Extended Life Media Drive System Part Number	Qty

Media Drive System

ZE500 Series printers will have either a **Standard Life Media Drive System** installed or an **Extended Life Media Drive System** installed. These different types of drive systems require ordering different replacement part numbers. Please read the notes below to determine the correct replacement part numbers to order based on the type of media drive system that is currently installed on the ZE500 printer in question.

The absence of the extended life media drive system identification label indicates a standard life drive system is installed.

The presence of the extended life media drive system identification label indicates an extended life drive system is installed.

- Determine the type of media drive system that is currently installed on the printer by verifying the presence or absence of the Extended Life Media Drive System label. ZE500 printers that currently have the extended life media drive system installed can be identified by the presence of a label affixed to the drive system cover displaying the text “**Extended life Media drive system**”. The absence of this label indicates that a standard life media drive system is currently installed on the printer.

Additional Information:

- ZE500 printers with serial numbers greater than 67J160800058 for 4 inch wide models and 68J160800073 for 6 inch wide models have an Extended Life Media Drive System installed.
- ZE500 printers with serial numbers less than 67J160800058 (for 4") and 68J160800073 (for 6") shipped with a standard life media drive system installed, but these printers may have been upgraded to use an extended life media drive system via the installation of one of the extended life media drive system kits.
- Be sure to select the correct part numbers for the drive system type currently installed on the printer in question. See the part number table on the next page.
